Personal Security

Personal security is an important factor in everyday life.

Do you worry about your child walking to school? Do you have an elderly parent that is looking to maintain some independence but from time to time gets a little confused? Do you have a son or daughter attending college or university and are concerned for their safety on campus? Do you have a friend or family member with special needs?

A personal GPS tracking unit equipped with a panic button might be the perfect

- *Our small and cost effective unit fits easily into a pocket or can be attached to a belt or bag.*
- *Information on the unit, such as location and speed of travel can be viewed from any computer or smartphone.*
- *Receive notifications by email or SMS text, so you are able to respond quickly if an emergency happens.*
- *Receive notifications if the wearer arrives or leaves a destination (set by you) such as a home, school, or shopping mall.*
- *Receive notifications if the tracker detects excessive speed, such as your child entering into a vehicle.*

This security tool can provide you with consistent peace-of-mind in knowing that your loved ones are safe and only the push of a button away from help in an emergency.

Home & Vacation Property Security

In today's world, you are looking for more than just an alarm system for your home or cottage. Not every security event is an emergency. Keep track of what is happening at your vacation property when you are home, and keep watch on your home while you are vacationing or at work.

The Connect2Go interface board makes your new or EXISTING Honeywell or DSC security system into one of the most economical options for keeping in constant connection with your properties through your computer or smartphone.

- Our interface board added to your security system allows you to control your DSC or Honeywell security system from any internet connected computer, tablet, or smartphone.
- Event notifications can be sent by email or SMS text. Receive a text or email to notify you that your son or daughter has arrived home or the dog walker has come by.
- Add Connect2Go cameras for increased security. Live video can be viewed from your internet connected device. Know who is at your door or view when your son or daughter arrives home from school.
- One of the most economical options on the market

Professional monitoring available.

Business Security

Improve the overall security of your business property and your employees by using Connect2Go solutions for business. We can work with your new or existing DSC or Honeywell security systems and give you more control over a traditional security system using various internet devices such as computers, tablets, and smartphones.

Keep track of your property, your staff and your equipment. Provide your employees with security options to increase their overall safety on the road and in the work environment

- Our interface board added to your security system allows you to control your DSC or Honeywell security system from any internet connected computer, tablet, or smartphone.
- Event notifications can be sent by email or SMS text. Receive a text or email to notify you that employees have arrived at the office
- Add Connect2Go cameras for increased security. Live video can be viewed from your internet connected device. Keep your staff safer with video surveillance.
- One of the most economical options on the market
- Professional monitoring available.

With the addition of the CG120 GPS tracking and emergency unit, give your lone workers, or on-location staff the added security of knowing that help is just the push-of-a-button away. Not only will the listed contacts know that there is an emergency and help is needed, they will also be able to pinpoint the tracker location using GPS technology.
